

## 2022/2023 Summer Research Project Description

<b>Project title:</b>	<b>Review of online nicotine vaping</b>
<b>Project duration, hours of engagement &amp; delivery mode</b>	10 weeks, 28 hours per week, meetings on-site at the School of Pharmacy and School of Population Health with some work from home.
<b>Description:</b>	You will review websites accessible to Australian consumers searching for nicotine vaping products as an aid to quit smoking. The aim will be to assess the websites against the TGA requirements for services supplying a schedule 4 medicine.
<b>Expected outcomes and deliverables:</b>	The student will gain experience of reviewing the literature, collecting data and analysing data.
<b>Suitable for:</b>	This project is open to students who have an interest in medicines regulation, good communication skills, and attention to detail. Some familiarity with smoking cessation and medicines regulation would be an advantage.
<b>Primary Supervisor:</b>	Assoc Prof Kathryn Steadman and Assoc Prof Coral Gartner.
