

UQ Summer Research Project Description

Please use this template to create a description of each research project, eligibility requirements and expected deliverables. Project details can then be uploaded to each faculty, school, institute, and centre webpage prior to the launch of the program.

Project title:	Designing and preparing a clinical trial protocol
Hours of engagement & delivery mode	6 weeks, 13 Jan – 21 Feb 2025 Between 20 – 36 hrs per week, flexible schedule Flexible work location – can be based at UQ Dutton Park or work from home.
Description:	You will help to prepare the protocol and supporting documentation for a clinical trial to test the pharmacokinetics of a medication. This will involve reviewing the relevant literature, similar studies and similar protocols in order to prepare the documentation. You will meet with the supervisor regularly, on site or via teleconference, for discussions and planning. This is an independent project that isn't directly associated with current research but involvement with the wider research team who work on related topics will be encouraged.
Expected learning outcomes and deliverables:	You will gain experience in medical writing, good clinical practice, and ethical review requirements.
Suitable for:	This project is suitable for students who have an appreciation of Good Clinical Practice, an interest in medical writing, and good written communication skills. Students who have completed a course in a related area, such as clinical trial design or research methods, and who are interested in a career in the clinical trials industry will be given priority. Previous experience as a participant of a clinical trial would be beneficial but is not necessary.
Primary Supervisor:	A/Prof Kathryn Steadman
Further info:	Please contact A/Prof Kathryn Steadman before submitting an application at k.steadman@uq.edu.au
